Locally owned by Jennifer Nugent who has over twenty years of experience in healthcare. Much of her experience has been in hospice and palliative care and is widely known in Acadiana as a dedicated patient advocate. She founded a nonprofit program to support the homeless and provide medical services to the elderly and disabled. Jennifer has partnered with Peristyle Residences to offer a unique approach to senior living for Lafayette.

Maison Levie is the namesake of Rita Levie Broussard. At 103, Rita remains a shining example of faith, strength and selfless service. A devoted mother, widowed since her 50s, she has spent her life giving to her community - sewing dolls and making rosaries to support those in need, and praying daily for anyone struggling. Her inspirational life is a true testament of love, gratitude and unwavering faith.

Memory Care Assisted Living Homes

Others are Homelike,
WE ARE HOME.

Call today to learn the difference between Homelike and Home 337-341-0608

Nestled on the banks of the Vermillion River, Maison Levie is a senior living community with two beautiful homes situated side by side on a quiet oak lined street a few blocks from the intersection of Pinhook and Bendel Road. Maison Levie is specifically designed and built for seniors, especially those living with Alzheimer's and dementia. Each custom built home features sixteen spacious private bedrooms, five ADA bathrooms, and elegantly appointed common areas that serve as warm, welcoming spaces for residents to relax and entertain. The quaint chapel in each home offers a graceful space for prayer. We provide assistance and supervision in true residences which are convenient, secure and luxurious. Our licensed communities are beautifully appointed and offer the intimacy that larger institutional assisted living communities cannot provide. Maison Levie is near Lafayette General Hospital and the campus of University of Louisiana at Lafayette.

We are committed to providing your loved ones with the exceptional care, compassion, comfort, communication, community, and choice that we would expect for our family members.

Our entire staff is specifically trained in the care of those with Alzheimer's and dementia. Our individualized programs are custom-designed to enrich each resident's life and enable them to function at the highest possible level. We provide a safe, calming, low-stress environment for seniors with moderate to severe memory impairments. We encourage families to decorate and furnish rooms with familiar items that are comforting and keep memories vivid.

Our team of professional caregivers includes a Registered Nurse/Wellness Coordinator, RN's that manage Medication Administration, a House Manager, an Activities Coordinator, and a caring, experienced team of CNA's. Our caregivers also undergo background checks.
